

Perfect Health Pick-Me-Up

Used for centuries in natural health medicine, Aloe Vera is one of the most recognizable supplements in the world. Whether a topical skin gel or a delicious tonic, Aloe Vera provides wonderful health support for the entire body. Aloe Vera contains many important nutrients for the body, including amino acids, B vitamins, and other nutrients that support general health. In addition, Aloe Vera provides vital support for healthy digestive and immune system function.

Aloe Vera juice is the perfect pick-me-up for anyone wanting to promote good health. 4Life's Aloe Vera is 99% juice. So you can benefit from the pure goodness of Aloe Vera in every delicious drop.

Key Points

- Natural Health Tonic:** Long prized for its benefit to the entire body, Aloe Vera contains a wide variety of healthful compounds, including amino acids, enzymes, vitamins, and minerals. Aloe Vera can be especially helpful in promoting a healthy digestive system, working gently to aid in the digestive process and keeping things running smoothly.
- Immune System Support:** Aloe Vera contains mannans, special polysaccharides that have been shown to provide important support for the immune system. Mannans activate immune responses and also support the innate immune system, your body's first and instinctive line of defense.
- Proprietary Process:** In order to retain all of the quality and effectiveness from the Aloe Vera plant, it must be processed quickly, within 36 hours of harvesting. 4Life's Aloe Vera juice is prepared using a proprietary process that employs flash cooling, pasteurization, and concentration to protect and preserve every ounce of Aloe Vera quality. This processing method also ensures that the enzymes and nutrients present in the juice remain active and effective.

Did you know?

There are over 240 different species of Aloe, but only one carries the health benefits prized for thousands of years: *Aloe barbadensis miller*, also known as Aloe Vera.

Technical Points

- There are 20 amino acids that the human body requires for optimum health. Eight of those are referred to as "essential" amino acids because, as the body does not manufacture them on its own, we have to supply them with diet. Aloe Vera contains all eight essential amino acids, plus 11 non-essential amino acids.
- Aloe Vera contains a wealth of vitamins, including vitamins A, B1, B2, B6, C, and E.

DIRECTIONS: Drink 1/2 to 1 oz. daily or mix with water or fruit juice at a dilution ratio of 1:10 (aloe vera: liquid). Makes 1 1/2 gallons. Refrigerate after opening.

Serving Size: One (1) fl. oz. (30 ml)
Servings Per Container: 16
